PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only

It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

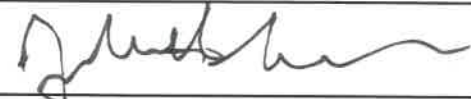

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

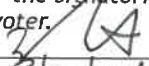

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

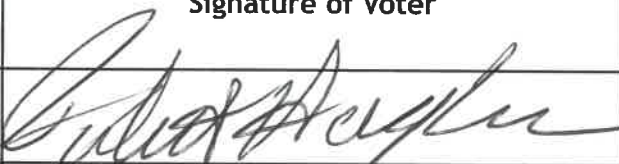

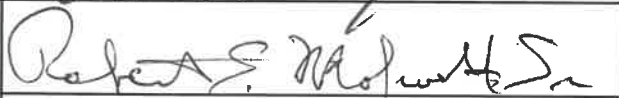

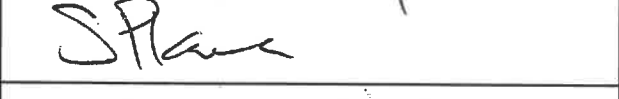

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only
1 ✓		Carissa Hanratty	11 Sprain Ave	2/1/23	CARISSA HANRATTY

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only
✓ 1 ✓		Larry J Sharp	6 Wood Rd	2/6/23	
✓ 2 ✓		Dan Robate	1 Cottage Lane	2/6/23	FRANCIS DANIEL RABATA

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only
1		DAVID BAGDASARIAN	35 Stonegate Rd Cape Elizabeth	1/30/2023

PETITION FOR ENACTMENT OF CAPE ELIZABETH RESIDENTIAL PESTICIDE USE ORDINANCE

Statement of Purpose: This ordinance is intended to safeguard the health, safety, and welfare of Cape Elizabeth residents and to conserve and protect its waterways and natural resources by restricting the widespread use of toxic pesticides on private, residential property for cosmetic landscape uses and outdoor pest management. It encourages residential landowners to adopt safer alternatives to toxic pesticides, including biological, mechanical and organic chemical treatments which are already readily available in the marketplace. It provides for adoption of additional treatment alternatives as the field of integrated pest management progresses. It is modeled upon ordinances adopted in many other Maine communities who have acted to provide a healthier and safer environment for their citizens, especially children who are most vulnerable to the long-term effects of exposure to synthetic chemicals in their environment. It represents a measured and practical regulation of products and activities that science recognizes are a substantial threat to our well-being.

This ordinance does not regulate pesticide use in commercial agriculture, or in maintaining utility rights of way, or upon any publicly owned or maintained property (e.g., public streets, paths, parks, playing fields, or grounds of Town buildings).

It does not regulate pesticide use within residences or insect repellents applied to persons and pets in accordance with manufacturers' instructions.

It does not require any Town licensure of persons to apply integrated pest management or alternatives to broadcasting toxic pesticides upon private residential properties.

It does not require residential property owners to hire State-licensed pesticide applicators to apply organic chemicals or provide integrated pest management.

TO THE MUNICIPAL OFFICERS OF THE TOWN OF CAPE ELIZABETH, MAINE: Pursuant to Article VIII, Section 3 of the Town Charter, each of the undersigned registered voters petitions for a referendum to see whether the Town will enact the Residential Pesticide Use Ordinance provisions attached hereto and incorporated herein (unless earlier enacted by the Town Council per the Town Charter).

The names and addresses of the registered voters of the Town of Cape Elizabeth are as follows:

No.	Signature of Voter	Printed Name	Voter Address	Date	Municipal Use Only
✓ 1		C. F. HAYWOOD	1221 Shore Rd
